## TRIAD TRIAMEX

TRIAD Triamex Fencing provides a strong and aesthetically pleasing perimeter fence suitable for most requirements. Efficient manufacturing processes ensure that Triamex Fencing is long lasting and affordable. The panels have square hollow section verticals set at a maximum 100mm gap, heavy-duty channel horizontal rails and are supported by rolled steel joist posts. Triamex Fencing is supplied Hot Dip Galvanised to BS EN ISO 1461 or Galvanised and Polyester Powder Coated. Standard heights are 1800mm, 2000mm, 2400mm and 3000mm and can be supplied with either square or angle tops. If undulating ground is a problem our special angle cleats allow the panels to be stepped on site and in particularly severe areas panels can be specially manufactured to suit the contour of the land. Domed headed bolts and permacone security nuts are supplied as standard to give additional security. Personnel and Vehicle entrance gates are also available to match all the Triamex Fencing range.

### TRIAD Triamex

To complement our standard Triamex fencing, we offer four alternative designs. All have the same specification as our standard range, but each offer an additional feature.
