TRI-TEX FENCING

TRI-TEX or 'prison fence' as it is commonly known is a security mesh fencing system with narrow apertures. This prevents the 'would be intruder' having any foot or finger holds therefore making it extremely difficult to climb. TRI-TEX panels are overlapped at each post and secured by a full length clamp strip, domed headed bolts and permacone security fixings. The introduction of colour has now made the TRI-TEX mesh system a popular choice when security is paramount.

TRI-TEX V

The inclusion of two pressed V bends to the panel adds additional rigidity to the panel. The heights vary slightly but the posts and fixing detail remain the same.

Standard heights: 2135, 2440 and 3000mm.

All other heights available on request.

Posts: Set at 2440mm nominal centres.

2135mm - 60 x 60 RHS

2440mm - 70 x 70 RHS

3000mm - 80 x 80 RHS

Wire: 4mm diameter with a mesh size of 76.2 x 12.7mm.

Fixings: Galvanised bolt, permacone security nut and full length clamp bar.

Finish: Posts and clamp bar - Hot Dip Galvanised to BS EN 1461 or

Galvanised & Polyester Powder Coated.
