TRIAD BOLLARDS

CAVERSWALL
 900mm high above ground. 194mm diameter steel bollard with loose cap. This enables the bollard to be filled with concrete for additional strength. Available Hot Dip Galvanised to BS EN ISO 1461 for on site painting, if required.

BACUP
 900mm high above ground. 114mm diameter with one groove and steel cap. 1200mm overall length. Available Hot Dip Galvanised or Polyester Powder Coated.

WIER
 900mm high above ground. 168mm diameter with two feature rings. 1200mm overall length. Available Hot Dip Galvanised to BS EN ISO 1461 or Polyester Powder Coated.

HINGED PARKING POST
 900mm above ground, 60.3mm diameter. Available Hot Dip Galvanised or Polyester Powder Coated.

STAINLESS STEEL BOLLARDS

TRIAD Stainless Steel Bollards are a statement of elegance combining attraction with function in the protection of any location.

TELESCOPIC POSTS

The Telescopic Posts are designed with ease of use in mind, it only takes seconds to raise each one and lock it in place using its integral security lock system. When not in use the pole simply slides back into the ground leaving only a small steel cover plate flush mounted with the ground.

RED

89mm outer diameter.
670mm raised height.
Lift up weight 12kg.

BLUE

90mm x 90mm square post.
670mm raised height. Lift up
weight 15kg.

RED and BLUE telescopic posts have anti ram protection as standard. At the shear point (ground level) they have an integral reinforced steel sleeve built in. They are available either Hot Dip Galvanised or Galvanised & Polyester Powder Coated. Standard colours are Black or Yellow.
