

TRIAD

HIGH SECURITY DOORS - MANUFACTURING AND INSTALLATION

Triad manage the full process of measuring, manufacturing and installing high security products. These products are available in a wide variety of designs, finishes and sizes. Our engineers will visit your site to measure and discuss your requirements. We will then recommend, or create products to suit your needs.

The garage doors pictured above have been designed, manufactured and installed by Triad to provide a high security deterrent to vandals and thieves. These doors have been installed at difficult locations across our client base for over 5 years and have provided consistent protection from thieves (not one has been broken into).
